▼	src/features/ticket/SuggestionPanel.test.tsx	14 passed	0.26s
✓ passed	> <SuggestionPanel /> > renders pips, rationale, and confidence badge in the ready state		69ms
✓ passed	> <SuggestionPanel /> > Apply click switches data-suggestion-state to "applied" and updates current margin to the suggested value		21ms
✓ passed	> <SuggestionPanel /> > Undo restores the previous margin and switches the panel back to "ready"		32ms
✓ passed	> <SuggestionPanel /> > Why? click reveals the factors table; second click hides it		34ms
✓ passed	> <SuggestionPanel /> > Apply triggers data-margin-glow on the PricingPanel margin input		29ms
✓ passed	> <SuggestionPanel /> > renders nothing when suggestion is null		2ms
✓ passed	> <SuggestionPanel /> > credit-decline (FXSW-026) > renders the \$7 message + Reject shortcut + data-suggestion-state="credit-decline"; Apply is absent		6ms
✓ passed	> <SuggestionPanel /> > credit-decline (FXSW-026) > Reject shortcut: single click does nothing; 600ms hold fires onReject		11ms
✓ passed	> <SuggestionPanel /> > Recompute (FXSW-026) > Recompute click flips data-suggestion-state to "computing" then back to "ready" after 800ms, calling onRecompute once		12ms
✓ passed	> <SuggestionPanel /> > Recompute (FXSW-026) > multiple rapid Recompute clicks debounce to one onRecompute call		11ms
✓ passed	> <SuggestionPanel /> > Recompute (FXSW-026) > Apply is disabled while in "computing" state		6ms

✓ passed	› <SuggestionPanel /> › Recompute (FXSW-026) › vol shift > 30% from last input triggers recompute	7ms
✓ passed	› <SuggestionPanel /> › Recompute (FXSW-026) › vol shift ≤ 30% does NOT trigger recompute	5ms
✓ passed	› <SuggestionPanel /> › resets internal applied/why state when the suggestion prop changes	14ms

▼	src/features/ticket/TicketPanel.test.tsx	5 passed	0.22s
✓ passed	› <TicketPanel /> › is not rendered when uiStore.openDealId === null		24ms
✓ passed	› <TicketPanel /> › renders when openDealId is set; contains the deal basic info		72ms
✓ passed	› <TicketPanel /> › Esc keypress calls uiStore.closeTicket()		19ms
✓ passed	› <TicketPanel /> › opening fires SI Pickup on the deal machine (Initial → PickupSent → PickedUp)		65ms
✓ passed	› <TicketPanel /> › closing does NOT fire Hold (the deal stays in PickedUp)		41ms

▼	src/features/blotter/ActiveBlotter.test.tsx	5 passed	0.20s
✓ passed	› <ActiveBlotter /> › renders the empty-state message when there are no active deals		70ms
✓ passed	› <ActiveBlotter /> › renders one row per active deal with correct data-deal-id		82ms
✓ passed	› <ActiveBlotter /> › row data-si-state and data-display-status reflect the underlying machine		19ms
✓ passed	› <ActiveBlotter /> › clicking a row calls uiStore.openTicket(dealId)		17ms
✓ passed	› <ActiveBlotter /> › terminal-state row gets data-removing="true" and unmounts at t+5000ms		13ms

▼	src/features/ticket/PricingPanel.test.tsx	9 passed	0.17s
✓ passed	› <PricingPanel /> › streaming mode (FXSW-017) › with the seeded feed, bid/ask/mid cells render expected pair-precision values		64ms
✓ passed	› <PricingPanel /> › streaming mode (FXSW-017) › on a value change, the cell gets data-flash="down" that clears after 80ms		18ms
✓ passed	› <PricingPanel /> › streaming mode (FXSW-017) › stale-feed (no tick for 3s) renders the em-dash placeholder in all cells		9ms

✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › click bid → data-pricing-mode="fixed" + bid cell gets data-focused	22ms
✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › Refresh button renders only in fixed mode	19ms
✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › + button increments margin by 1; - decrements	10ms
✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › keypress "+" / "-" does the same as the buttons	9ms
✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › margin floor is 1 — both - button and - key clamp	9ms
✓ passed	› <PricingPanel /> › fixed mode (FXSW-018) › programmatic margin update (FXSW-025 Apply simulation) animates data-margin-glow for 600ms	14ms
▼ src/features/blotter/HistoricBlotter.test.tsx 2 passed 0.15s		
✓ passed	› <HistoricBlotter /> › renders the empty-state message when there are no historic deals	53ms
✓ passed	› <HistoricBlotter /> › renders one row per historic entry with the correct outcome label	100ms
▼ src/features/notifications/MuteToggle.test.tsx 3 passed 0.13s		
✓ passed	› <MuteToggle /> › renders Bell icon when unmuted; aria-pressed=false	102ms
✓ passed	› <MuteToggle /> › click flips state and swaps icon attributes	18ms
✓ passed	› <MuteToggle /> › second click flips back to unmuted	5ms
▼ src/features/ticket/TicketFooter.test.tsx 7 passed 0.11s		
✓ passed	› <TicketFooter /> › in SI PickedUp streaming mode: Send Stream + Release + Reject visible; Withdraw / Send Quote / Return-to-Stream hidden	57ms
✓ passed	› <TicketFooter /> › in SI PickedUp fixed mode: Send Quote + Release + Reject + Return-to-Stream visible; Send Stream hidden	8ms
✓ passed	› <TicketFooter /> › in SI Quoted: Withdraw + Reject visible; Release also visible per §4.7	8ms
✓ passed	› <TicketFooter /> › Reject single-click does not fire; pointerDown + 600ms hold fires	15ms
✓ passed	› <TicketFooter /> › Send Stream fires Quote; siState cycles QuoteSent → Quoted with the ack delay	9ms
✓ passed	› <TicketFooter /> › Send Stream button shows in-flight spinner during QuoteSent	6ms

✓ passed › <TicketFooter /> › Release fires Hold; siState cycles HoldSent → Initial; dealable flips back to true 7ms

▼ src/features/notifications/ToastStack.test.tsx 6 passed 0.11s

✓ passed › <ToastStack /> + dispatcher › toast appears when a new SI deal lands in Initial + dealable 57ms

✓ passed › <ToastStack /> + dispatcher › toast auto-dismisses at 6s 13ms

✓ passed › <ToastStack /> + dispatcher › toast click calls uiStore.openTicket(dealId) and dismisses the toast 16ms

✓ passed › <ToastStack /> + dispatcher › does NOT re-fire when a previously-picked-up deal is Released back to dealable 13ms

✓ passed › <ToastStack /> + dispatcher › ESP deals (no rejection reasons) do not trigger a toast 4ms

✓ passed › <ToastStack /> + dispatcher › dispatcher also fires the document-title flash 2ms

▼ src/App.test.tsx 4 passed 0.09s

✓ passed › App › renders without error and contains "FX Sales Workstation" 55ms

✓ passed › App › does NOT contain the string "Caplin" anywhere in rendered output 9ms

✓ passed › App › with ?dev=1 in the URL, the dev-injector slot is visible 19ms

✓ passed › App › without ?dev=1, the dev-injector slot is not visible 10ms

▼ src/features/ticket/ClientSummaryPanel.test.tsx 5 passed 0.07s

✓ passed › <ClientSummaryPanel /> › EURUSD bid=1.0850, ask=1.0852, margin=3 → client bid 1.0847 / client ask 1.0855 39ms

✓ passed › <ClientSummaryPanel /> › USDJPY (2-decimal pip): bid=157.77, ask=157.78, margin=3 → 157.74 / 157.81 9ms

✓ passed › <ClientSummaryPanel /> › estimated profit updates when margin changes (re-renders within one frame) 8ms

✓ passed › <ClientSummaryPanel /> › uses whichever tick the parent passes (fixed-mode captured rate vs live) 9ms

✓ passed › <ClientSummaryPanel /> › renders em-dash placeholders when no tick is available 5ms

▼ src/features/ticket/DealSummaryPanel.test.tsx 4 passed 0.06s

✓ passed › <DealSummaryPanel /> › settlement date is T+2 weekdays from a Monday trade date 44ms

✓ passed	› <DealSummaryPanel /> › handles weekend trade-date rollover correctly (Thursday → Monday)	5ms
✓ passed	› <DealSummaryPanel /> › handles Friday → Tuesday rollover (skips Sat + Sun)	4ms
✓ passed	› <DealSummaryPanel /> › renders direction with base CCY and the notional	5ms
▼ src/features/notifications/useNotificationSound.test.tsx 4 passed 0.06s		
✓ passed	› useNotificationSound › does NOT schedule before the first user gesture (audio not yet unlocked)	35ms
✓ passed	› useNotificationSound › schedules an OscillatorNode on a new SI deal once audio is unlocked AND unmuted	8ms
✓ passed	› useNotificationSound › does NOT schedule when muted, even after unlock + new SI deal	6ms
✓ passed	› useNotificationSound › schedules once per new SI deal, not per render	6ms
▼ src/features/ticket/ReasonsPanel.test.tsx 3 passed 0.05s		
✓ passed	› <ReasonsPanel /> › given ['OFF_HOURS'], renders one chip containing 'Outside trading window'	38ms
✓ passed	› <ReasonsPanel /> › given ['SIZE_LIMIT', 'CREDIT_LIMIT'], renders two chips with the right text	8ms
✓ passed	› <ReasonsPanel /> › given [], renders nothing	2ms
▼ src/features/ticket/SummaryPanel.test.tsx 2 passed 0.04s		
✓ passed	› <SummaryPanel /> › given Globex SELL 5M USDJPY for SPOT, renders the expected sentence	37ms
✓ passed	› <SummaryPanel /> › shows account, trade date, and T+2 settlement date in the key/value strip	5ms
▼ src/state/machines/dealMachine.test.ts 11 passed 0.03s		
✓ passed	› dealMachine cross-model coordination › spawns both children on init with shared dealId in context	8ms
✓ passed	› dealMachine cross-model coordination › Pickup: SI Initial → PickupSent → PickedUp; RFS Queued → PickedUp	5ms
✓ passed	› dealMachine cross-model coordination › Hold from PickedUp: SI PickedUp → HoldSent → Initial; RFS PickedUp → Queued	3ms

✓ passed	› dealMachine cross-model coordination › Quote: SI PickedUp → QuoteSent → Quoted; RFS PickedUp → Executable	1ms
✓ passed	› dealMachine cross-model coordination › Withdraw from Quoted: SI Quoted → WithdrawSent → PickedUp; RFS Executable → PickedUp	2ms
✓ passed	› dealMachine cross-model coordination › Reject from PickedUp: SI → RejectSent → TraderRejected (terminal)	1ms
✓ passed	› dealMachine cross-model coordination › Reject from Quoted: SI → RejectSent → TraderRejected (terminal)	2ms
✓ passed	› dealMachine cross-model coordination › ClientReject in Quoted: SI → ClientRejected (terminal)	1ms
✓ passed	› dealMachine cross-model coordination › TradeConfirmed: both SI and RFS go to TradeConfirmed	1ms
✓ passed	› dealMachine cross-model coordination › every terminal SI state fires removeFromActive (transitions to Removed) after 5000ms	3ms
✓ passed	› dealMachine cross-model coordination › terminal states reject all subsequent events (no transitions)	2ms
▼ src/services/feed/usePrice.test.tsx 2 passed 0.03s		
✓ passed	› usePrice › subscribes on mount and delivers a tick within 600ms of start()	22ms
✓ passed	› usePrice › unsubscribes on unmount; no further state updates after	3ms
▼ tests/unit/fetch-reference-mids.test.ts 4 passed 0.03s		
✓ passed	› fetch-reference-mids › round(1/0.85361, 4) returns 1.1715	4ms
✓ passed	› fetch-reference-mids › with a Frankfurter-shaped response, writes USD-based inverted mids	6ms
✓ passed	› fetch-reference-mids › with fetch throwing, writes the fallback and resolves (exit 0)	11ms
✓ passed	› fetch-reference-mids › with a non-ok HTTP response, writes the fallback	4ms
▼ src/state/stores/dealsStore.test.ts 14 passed 0.02s		
✓ passed	› dealsStore › addDeal creates an entry and starts an actor in the initial state	8ms
✓ passed	› dealsStore › removeDeal stops the actor; subsequent forwardEvent is a no-op (no errors)	3ms
✓ passed	› dealsStore › forwardEvent advances the SI machine through PickupSent → PickedUp	5ms

✓ passed	› dealsStore › addDeal lands the entry in the active map, not historic	2ms
✓ passed	› dealsStore › a deal driven through TradeConfirmed → Removed migrates to historic with the right outcome	3ms
✓ passed	› dealsStore › addDeal for two deals creates two independent actors	1ms
✓ passed	› isHistoric › classifies TradeConfirmed as historic	0ms
✓ passed	› isHistoric › classifies TraderRejected as historic	0ms
✓ passed	› isHistoric › classifies ClientRejected as historic	0ms
✓ passed	› isHistoric › classifies Initial as active	0ms
✓ passed	› isHistoric › classifies PickUpSent as active	0ms
✓ passed	› isHistoric › classifies PickedUp as active	0ms
✓ passed	› isHistoric › classifies QuoteSent as active	0ms
✓ passed	› isHistoric › classifies Quoted as active	0ms

▼	src/features/notifications/titleFlash.test.ts	2 passed	0.02s
✓ passed	› flashDocumentTitle › prefixes the title with "● " for 5 seconds and restores it		12ms
✓ passed	› flashDocumentTitle › repeated calls within the window do not double-prefix		4ms

▼	src/services/feed/pricingFeed.test.ts	6 passed	0.01s
✓ passed	› pricingFeed › subscribe receives a tick within 600ms of start()		7ms
✓ passed	› pricingFeed › two subscriptions to the same pair both receive ticks		1ms
✓ passed	› pricingFeed › unsubscribe stops one callback; other subscribers keep receiving		1ms
✓ passed	› pricingFeed › with seed = 42, first 5 EURUSD ticks match the recorded reference sequence		2ms
✓ passed	› pricingFeed › after stop(), no further callbacks fire even if start() is called again with the same seed		1ms
✓ passed	› pricingFeed › getLatest returns null before any tick, then the latest tick		1ms

▼	src/services/suggestion/engine.test.ts	34 passed	0.01s
✓ passed	› suggestMargin › tier baseline › platinum (1.5) → 2 pips with only the Client tier factor		3ms

✓ passed	› suggestMargin › tier baseline › gold (2) → 2 pips	0ms
✓ passed	› suggestMargin › tier baseline › standard (3) → 3 pips	0ms
✓ passed	› suggestMargin › tier baseline › new (4) → 4 pips	1ms
✓ passed	› suggestMargin › notional band › ≤5M USD → no Notional size factor	1ms
✓ passed	› suggestMargin › notional band › 5–10M USD → +0.5	0ms
✓ passed	› suggestMargin › notional band › 10–20M USD → +1.5	0ms
✓ passed	› suggestMargin › notional band › >20M USD → +2.5	0ms
✓ passed	› suggestMargin › notional band › non-USD-base pair: 12M EUR × 1.1715 mid ≈ 14M USD → 10–20M band (+1.5)	1ms
✓ passed	› suggestMargin › market context › pairVolatility > 1.5 → +1 Volatility factor	1ms
✓ passed	› suggestMargin › market context › pairVolatility ≤ 1.5 → no Volatility factor	0ms
✓ passed	› suggestMargin › market context › thin liquidity → +1.5 Session liquidity factor	0ms
✓ passed	› suggestMargin › market context › USDJPY (HIGH_VOL_PAIRS) → +0.5 Pair class factor	0ms
✓ passed	› suggestMargin › market context › USDINR (HIGH_VOL_PAIRS) → +0.5 Pair class factor	0ms
✓ passed	› suggestMargin › market context › EURUSD → no Pair class factor	1ms
✓ passed	› suggestMargin › rejection reasons › OFF_HOURS → +1.5 Off-hours factor	0ms
✓ passed	› suggestMargin › rejection reasons › SIZE_LIMIT → +0.5 Size band breach factor	0ms
✓ passed	› suggestMargin › rejection reasons › CREDIT_LIMIT → returns credit-decline shape with no suggestedPips	1ms
✓ passed	› suggestMargin › rejection reasons › CREDIT_LIMIT takes precedence over other reasons	0ms
✓ passed	› suggestMargin › client behavior › flight_risk → -1 Retention factor	0ms
✓ passed	› suggestMargin › client behavior › high_engagement + vol > 100M → -0.5 VIP volume factor	0ms
✓ passed	› suggestMargin › client behavior › high_engagement + vol ≤ 100M → no VIP volume factor	1ms
✓ passed	› suggestMargin › client behavior › normal behavior → no Retention or VIP factor	0ms
✓ passed	› suggestMargin › client behavior › acceptance rate < 0.4 → -0.5 Acceptance rate factor	0ms
✓ passed	› suggestMargin › client behavior › acceptance rate ≥ 0.4 → no Acceptance rate factor	0ms
✓ passed	› suggestMargin › confidence › established tier + vol > 10M + normal liquidity → high	0ms

✓ passed	› suggestMargin › confidence › new tier → low (even with high volume + normal liquidity)	0ms
✓ passed	› suggestMargin › confidence › thin liquidity → low	0ms
✓ passed	› suggestMargin › confidence › vol < 1M → low	0ms
✓ passed	› suggestMargin › confidence › between 1M and 10M with established tier + normal liquidity → medium	0ms
✓ passed	› suggestMargin › algebraic invariant › sum of factor deltas + tier base equals pre-rounded base (across 5 sampled inputs)	1ms
✓ passed	› suggestMargin › floor › platinum + flight_risk + low acceptance still yields ≥ 1 pip	0ms
✓ passed	› suggestMargin › canonical scenarios (docs/09 §8) › Globex / 5M USDJPY / OFF_HOURS → 5 pips	0ms
✓ passed	› suggestMargin › canonical scenarios (docs/09 §8) › Northwind / 12M EURUSD / SIZE_LIMIT → 4 pips	1ms

▼	src/state/stores/settingsStore.test.ts	5 passed	0.01s
✓ passed	› useSettingsStore › defaults to unmuted		2ms
✓ passed	› useSettingsStore › toggleMute flips the flag		0ms
✓ passed	› useSettingsStore › persists to sessionStorage on toggle		1ms
✓ passed	› useSettingsStore › setMuted writes the value and persists		0ms
✓ passed	› useSettingsStore › restores muted state from sessionStorage on reload		10ms

▼	src/state/stores/dealsBootstrap.test.ts	2 passed	0.01s
✓ passed	› wireDealFeedToStore › inject(HAPPY_PATH_ESP) adds an entry to dealsStore		10ms
✓ passed	› wireDealFeedToStore › inject(CREDIT_BREACH) adds an entry with the SI deal payload		2ms

▼ tests/unit/tailwind.config.test.ts	45 passed	0.01s
✓ passed › tailwind config — colors › maps bg-app to #0a0a0f		1ms
✓ passed › tailwind config — colors › maps bg-panel to #111118		1ms
✓ passed › tailwind config — colors › maps bg-panel-2 to #16161f		0ms
✓ passed › tailwind config — colors › maps bg-elevated to #1c1c27		0ms

✓ passed	› tailwind config — colors › maps bg-row-hover to #1f1f2b	0ms
✓ passed	› tailwind config — colors › maps border to #23232f	0ms
✓ passed	› tailwind config — colors › maps border-strong to #2e2e3d	0ms
✓ passed	› tailwind config — colors › maps border-focus to #6366f1	0ms
✓ passed	› tailwind config — colors › maps text to #f1f1f5	1ms
✓ passed	› tailwind config — colors › maps text-dim to #a1a1ab	0ms
✓ passed	› tailwind config — colors › maps text-mute to #62626f	0ms
✓ passed	› tailwind config — colors › maps amber to #fbbf24	0ms
✓ passed	› tailwind config — colors › maps blue to #3b82f6	0ms
✓ passed	› tailwind config — colors › maps blue-soft to #7aa7ff	0ms
✓ passed	› tailwind config — colors › maps teal to #14c4a8	0ms
✓ passed	› tailwind config — colors › maps teal-dim to #2e8073	0ms
✓ passed	› tailwind config — colors › maps green to #22c55e	0ms
✓ passed	› tailwind config — colors › maps red to #ef4444	0ms
✓ passed	› tailwind config — colors › maps ai-accent to #818cf8	0ms
✓ passed	› tailwind config — colors › maps ai-accent-2 to #a78bfa	1ms
✓ passed	› tailwind config — colors › maps tick-up to #22c55e	0ms
✓ passed	› tailwind config — colors › maps tick-down to #ef4444	0ms
✓ passed	› tailwind config — colors › maps focus-ring to #6366f1	0ms
✓ passed	› tailwind config — spacing › maps spacing.1 to 4px	1ms
✓ passed	› tailwind config — spacing › maps spacing.2 to 8px	0ms
✓ passed	› tailwind config — spacing › maps spacing.3 to 12px	0ms
✓ passed	› tailwind config — spacing › maps spacing.4 to 16px	0ms
✓ passed	› tailwind config — spacing › maps spacing.5 to 20px	0ms
✓ passed	› tailwind config — spacing › maps spacing.6 to 24px	0ms
✓ passed	› tailwind config — spacing › maps spacing.8 to 32px	0ms

✓ passed	› tailwind config — spacing › maps spacing.10 to 40px	0ms
✓ passed	› tailwind config — border radius › maps borderRadius.sm to 4px	0ms
✓ passed	› tailwind config — border radius › maps borderRadius.md to 6px	1ms
✓ passed	› tailwind config — border radius › maps borderRadius.lg to 10px	0ms
✓ passed	› tailwind config — border radius › maps borderRadius.xl to 14px	0ms
✓ passed	› tailwind config — font size › maps fontSize.xs to 11px	0ms
✓ passed	› tailwind config — font size › maps fontSize.sm to 12px	0ms
✓ passed	› tailwind config — font size › maps fontSize.base to 13px	0ms
✓ passed	› tailwind config — font size › maps fontSize.md to 14px	0ms
✓ passed	› tailwind config — font size › maps fontSize.lg to 18px	0ms
✓ passed	› tailwind config — font size › maps fontSize.xl to 26px	0ms
✓ passed	› tailwind config — font size › maps fontSize.2xl to 32px	0ms
✓ passed	› tailwind config — font families › puts Geist first in sans stack	0ms
✓ passed	› tailwind config — font families › puts Geist Mono first in mono stack	0ms
✓ passed	› tailwind config — shadows › declares panel, ticket, and ai shadows	0ms

▼ tests/unit/tokens.test.ts	49 passed	0.01s
✓ passed	› design tokens — backgrounds › declares --color-bg-app as #0a0a0f	2ms
✓ passed	› design tokens — backgrounds › declares --color-bg-panel as #111118	0ms
✓ passed	› design tokens — backgrounds › declares --color-bg-panel-2 as #16161f	0ms
✓ passed	› design tokens — backgrounds › declares --color-bg-elevated as #1c1c27	1ms
✓ passed	› design tokens — backgrounds › declares --color-bg-row-hover as #1f1f2b	0ms
✓ passed	› design tokens — backgrounds › declares overlay and glass with rgba values	0ms
✓ passed	› design tokens — borders › declares --color-border as #23232f	0ms
✓ passed	› design tokens — borders › declares --color-border-strong as #2e2e3d	0ms
✓ passed	› design tokens — borders › declares --color-border-focus as #6366f1	0ms

✓ passed	› design tokens — text › declares --color-text as #f1f1f5	1ms
✓ passed	› design tokens — text › declares --color-text-dim as #a1a1ab	0ms
✓ passed	› design tokens — text › declares --color-text-mute as #62626f	0ms
✓ passed	› design tokens — status colors › declares --color-amber as #fbbf24	0ms
✓ passed	› design tokens — status colors › declares --color-blue-soft as #7aa7ff	1ms
✓ passed	› design tokens — status colors › declares --color-blue as #3b82f6	0ms
✓ passed	› design tokens — status colors › declares --color-teal as #14c4a8	0ms
✓ passed	› design tokens — status colors › declares --color-teal-dim as #2e8073	0ms
✓ passed	› design tokens — status colors › declares --color-green as #22c55e	0ms
✓ passed	› design tokens — status colors › declares --color-red as #ef4444	0ms
✓ passed	› design tokens — status colors › declares --color-grey-500 as #62626f	0ms
✓ passed	› design tokens — status colors › declares --color-grey-700 as #3e3e4d	0ms
✓ passed	› design tokens — AI accent family › declares --color-ai-accent as #818cf8	1ms
✓ passed	› design tokens — AI accent family › declares --color-ai-accent-2 as #a78bfa	0ms
✓ passed	› design tokens — AI accent family › declares AI wash and border with rgba values per spec	0ms
✓ passed	› design tokens — functional colors › declares --color-tick-up as #22c55e	0ms
✓ passed	› design tokens — functional colors › declares --color-tick-down as #ef4444	0ms
✓ passed	› design tokens — functional colors › declares --color-focus-ring as #6366f1	0ms
✓ passed	› design tokens — typography › declares font families	1ms
✓ passed	› design tokens — typography › declares --text-xs as 11px	0ms
✓ passed	› design tokens — typography › declares --text-sm as 12px	0ms
✓ passed	› design tokens — typography › declares --text-base as 13px	0ms
✓ passed	› design tokens — typography › declares --text-md as 14px	0ms
✓ passed	› design tokens — typography › declares --text-lg as 18px	0ms
✓ passed	› design tokens — typography › declares --text-xl as 26px	0ms
✓ passed	› design tokens — typography › declares --text-2xl as 32px	0ms

✓ passed	› design tokens — typography › declares line heights and letter spacing	1ms
✓ passed	› design tokens — spacing scale › declares --space-1 as 4px	0ms
✓ passed	› design tokens — spacing scale › declares --space-2 as 8px	0ms
✓ passed	› design tokens — spacing scale › declares --space-3 as 12px	0ms
✓ passed	› design tokens — spacing scale › declares --space-4 as 16px	0ms
✓ passed	› design tokens — spacing scale › declares --space-5 as 20px	1ms
✓ passed	› design tokens — spacing scale › declares --space-6 as 24px	0ms
✓ passed	› design tokens — spacing scale › declares --space-8 as 32px	0ms
✓ passed	› design tokens — spacing scale › declares --space-10 as 40px	0ms
✓ passed	› design tokens — radii › declares --radius-sm as 4px	0ms
✓ passed	› design tokens — radii › declares --radius-md as 6px	0ms
✓ passed	› design tokens — radii › declares --radius-lg as 10px	0ms
✓ passed	› design tokens — radii › declares --radius-xl as 14px	0ms
✓ passed	› design tokens — shadows › declares panel, ticket, and ai shadows	1ms

▼	src/services/feed/dealFeed.test.ts	4 passed	0.01s
✓ passed	› dealFeed › subscribe(cb) receives events		4ms
✓ passed	› dealFeed › inject(HAPPY_PATH_ESP) emits NEW_ESP_DEAL synchronously, schedules CLIENT_ACCEPT for t+2000		2ms
✓ passed	› dealFeed › inject(OFF_HOURS_INTERVENTION) emits NEW_SI_DEAL; CLIENT_ACCEPT fires only after a SEND_STREAM ack		2ms
✓ passed	› dealFeed › reset() mid-scenario cancels pending events; no callbacks fire after		1ms

▼	src/state/machines/siMachine.test.ts	4 passed	0.01s
✓ passed	› siMachine › starts in Initial		4ms
✓ passed	› siMachine › send({type:'PickUp'}) transitions to PickupSent		2ms
✓ passed	› siMachine › after 250ms (ackDelayMs default) transitions PickupSent → PickedUp		3ms
✓ passed	› siMachine › with timings.ackDelayMs = 0 the transition completes on the next tick		1ms

▼ <code>src/services/scenarios/player.test.ts</code>		2 passed	0.01s
✓ passed	› createScenarioPlayer › inject() returns the generated dealId and uses the supplied generator		4ms
✓ passed	› createScenarioPlayer › notifyDealState ignores non-matching dealId and non-matching state		2ms
▼ <code>src/state/machines/rfsMachine.test.ts</code>		2 passed	0.01s
✓ passed	› rfsMachine › starts in Queued		4ms
✓ passed	› rfsMachine › send({type:'PickUp'}) transitions Queued → PickedUp		2ms
▼ <code>src/services/suggestion/rationale.test.ts</code>		7 passed	0.01s
✓ passed	› buildRationale › docs/09 §8 example — Northwind / 12M EURUSD / SIZE_LIMIT → matches "Gold-tier client ... 12M EURUSD ... above auto-pricer band ... 4 pips"		2ms
